Cyberdyne Campaign Performance Analysis

Group Members:

Tisha Amali
Anjali Anantharaman
Rithu Rao Beedu
Praneth Nandeesh
Rohan Satish

Overview

Objective:

To evaluate the effectiveness of Cyberdyne’s recent marketing campaigns across platforms - Google, Facebook, Instagram, and LinkedIn and recommend data-driven optimizations for future investment.

What This Analysis Covers:

- Campaign performance metrics (ROI, CTR, Profit, CPC)
- Best budget allocation strategies ($2K, $5K, $30K scenarios)
- Confounders and data limitations
- Creative strategy and platform-specific ad recommendations
- Use of organic vs. paid social media content

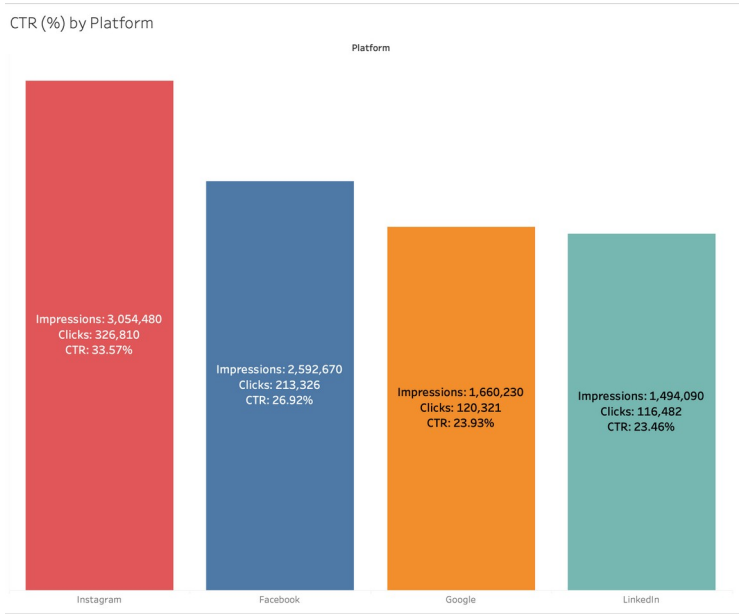

Goal:

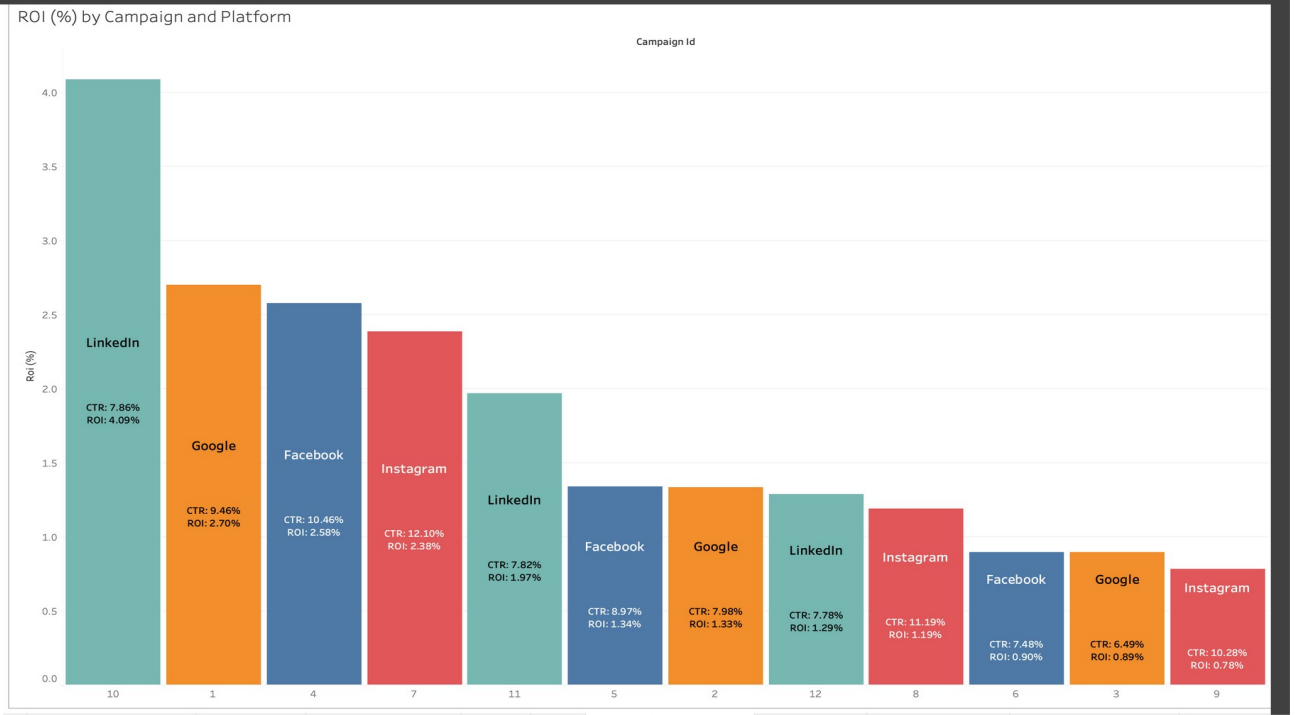

Provide actionable insights to help Cyberdyne spend smarter, engage more effectively, and maximize marketing ROI.

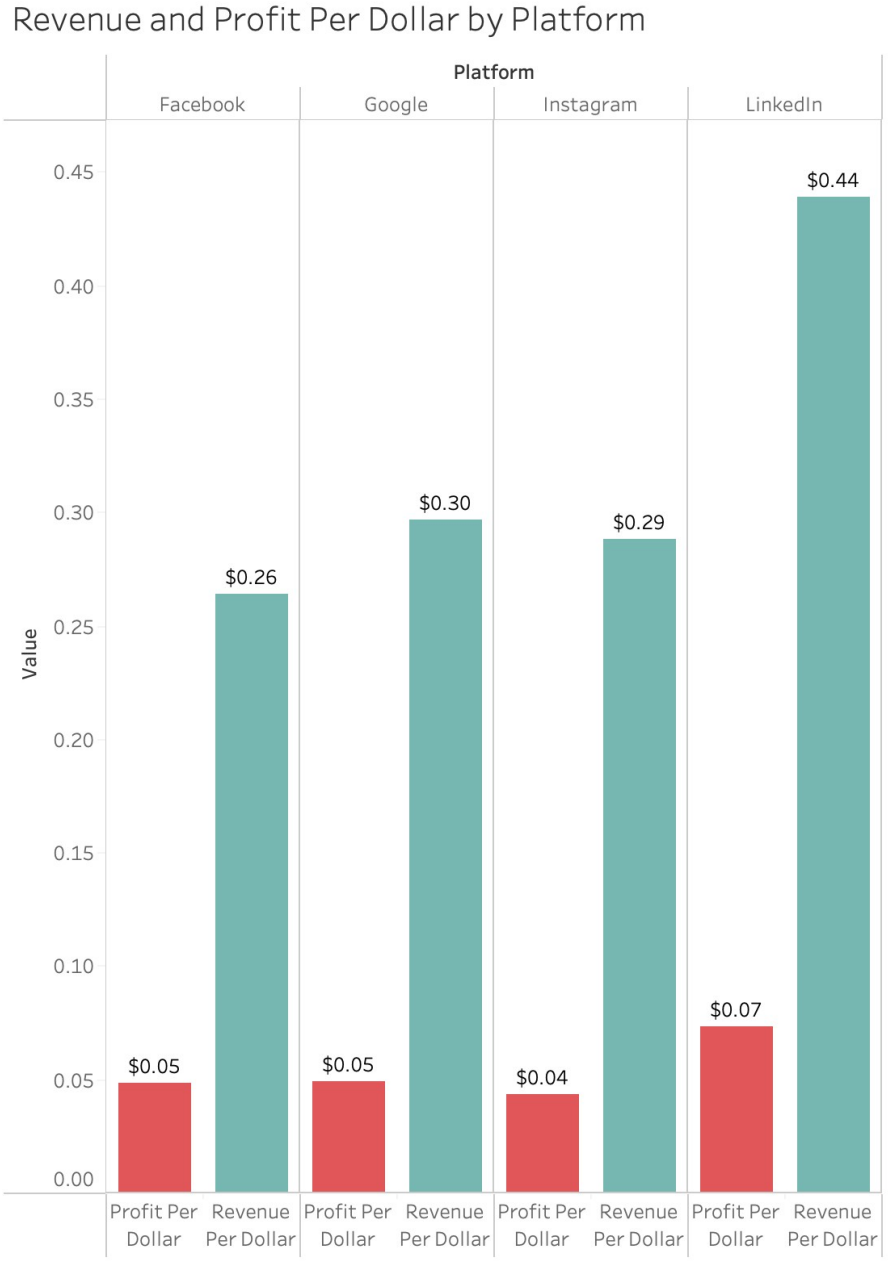

Campaign Performance Analysis

Campaign	Platform	ROI (%)	CTR (%)	Key Strength
10	LinkedIn	4.09%	7.86%	Highest ROI – efficient investment
1	Google	2.70%	9.46%	Balanced ROI and engagement
7	Instagram	2.38%	**12.10 %**	Best CTR – strong user interest
4	Facebook	2.58%	10.46%	Solid all-round performance

Allocation Plan

Platform	Campaign	Budget	Reason
LinkedIn	10	$2,000	Highest ROI (4.09%) - best profit per dollar
Instagram	7	$1,200	Highest CTR (12.10%) and lowest CPC - excellent engagement
Google	1	$1,000	Strong ROI (2.70%) - efficient spender
Facebook	4	$800	Solid CTR and ROI - scalable performer

Estimated Profit: ≈ $158

- Campaign 10: $2,000 × 4.09% = $81.80
- Campaign 7: $1,200 × 2.38% = $28.56
- Campaign 1: $1,000 × 2.70% = $27.00
- Campaign 4: $800 × 2.58% = $20.64

Conclusion:

This strategy balances efficiency and engagement across platforms. It maximizes return, minimizes risk, and scales proven performers making the most of a $5,000 investment.

Best Platform for a $30,000 Marketing Budget

Goal:

Identify the most promising platform(s) to maximize profit, engagement, and cost efficiency using performance data.

Platform	Avg. ROI (%)	CTR (%)	Cost Per Click
LinkedIn	2.45%	7.82%	$10.93
Instagram	1.45%	11.19%	$6.94
Facebook	1.60%	8.97%	$7.51
Google	1.64%	7.97%	$9.95

Platform	Budget	Reason
LinkedIn	$12,000	Best ROI - invest for highest return
Instagram	$8,000	High CTR and low CPC - ideal for visibility
Facebook	$6,000	Solid backup - supports broader targeting
Google	$4,000	Use selectively for niche search intent

Insights:

- LinkedIn delivers the highest ROI and best returns per dollar - ideal for high-budget efficiency.
- Instagram has the best engagement and lowest cost per click - great for audience reach.
- Facebook and Google perform moderately - useful for testing and targeting but not for lead scaling.

Prioritize LinkedIn and Instagram for the majority of spending. These channels offer the best mix of profitability and engagement, making them the most promising choices for large-scale investment.

Same Ad Across All Platforms

→ One creative (ad.png) used for Google, Facebook, Instagram, and LinkedIn

→ Doesn’t match platform-specific user behavior

Different Products in Each Campaign

→ Varying product price and profit margin across campaigns

→ ROI may reflect product mix, not true ad performance

Large Differences in Campaign Spend

→ Example: Campaign 9 = $1.3M vs. Campaign 10 = $92K

→ Bigger spend may reduce ROI due to diminishing returns

High CTR But Low ROI

→ Campaign 9: CTR = 10.28%, ROI = 0.78%

→ Clicks didn’t convert possible post-click problem

No Attribution Model Provided

→ No info on whether revenue is from first-click, last-click, or multi-touch

→ May undervalue top-of-funnel platforms like Instagram

Should We Fine-Tune the Ad for Each Platform?

Backed by the Data:

- **Instagram**: CTR = 33.57%, ROI = only 0.78% → needs better conversion-oriented creative
- **LinkedIn**: ROI = 4.09% with fewer clicks → shows power of message-audience alignment

Platform	Audience Type	What Works Better	Example
Instagram	Visual-first Gen Z	Trendy, story-style visuals, quick CTA	“ Style meets savings! Tap to unlock today’s top picks!”
Facebook	Families, casual shoppers	Lifestyle images + benefit messaging	“Refresh your space. Deals on tech, shoes & more!”
Google	High-intent buyers	Specific keywords and urgency	“Top-rated monitors – 25% Off Today Only!”
LinkedIn	Professionals	Professional tone, productivity/value focused	“Upgrade your workflow. Premium gear at great prices.”

Regular Post vs. Paid Ad on Social Media

Aspect	Regular Post	Paid Ad
Objective	Build brand awareness & community engagement	Drive traffic, leads, or direct conversions
Audience	Existing followers (organic reach)	Targeted users (custom demographics/interests)
Cost	Free (except content creation)	Paid per impression or click (PPC/CPM)
Lifespan	Short-term visibility in feed	Set duration, can run longer and reach wider
Control	Less control over who sees it	Full control over audience targeting

Paid Ad (Targeted Campaign)

Objective: Drive traffic and sales

Example:

“ Flash Sale: 25% Off Tech & Sneakers – Today Only! Tap 'Shop Now' to grab your deal before it’s gone!”

Regular Post (Brand Account)

Objective: Build connection with existing followers

Example:

“ Behind the scenes of our new product shoot! What color should we launch first? Comment below! ”

Thank you
